Education

New York University: B.Sc in Computer Science, Minor: Business

Relevant Courses: Distributed Systems, Databases, Machine Learning, Agile and DevOps, Object Oriented Programming, Operating Systems, Design & Analysis of Algorithms, Data Structures

Objective Statement

Ambitious Computer Science graduate with a strong foundation in software and data engineering, GenAI, project management seeking an entry-level software engineering role to apply technical skills and contribute to innovative projects. Eager to leverage experience from leading clinical trial software company Medidata and Microsoft to drive impactful solutions in a dynamic team environment.

Work Experience

Medidata Solutions Inc.

New York, NY

AI Software Engineering Associate

June 2024-August 2024

- Boosted medical record retrieval accuracy for 40k+ records by evaluating and implementing different embedding models, integrating semantic search with **optimized SQL** queries.
- Converted legacy C# scripts to Python, improving maintainability and aligning with future tech stack.
- Enabled scalable search capabilities by curating large structured datasets into full-text search and embeddings using AWS ECS and PGvector.
- Identified and resolved key user pain points through Pendo analytics-driven visualizations and issue tracking.

Microsoft AI Co-Innovation Labs

Shanghai, China

Software Development Associate

June 2023-August 2023

- Developed application using **Azure** services and LangChain to **facilitate employee-database communication**
- Designed and developed **React** component widget and **REST API** for chatbot **integrated into company portal**
- Utilized **embeddings, prompt engineering, and Langchain Agents** to convert relational data into easy to read summarizations for product managers to generate reports on tabular data

Jika.io

Remote

Technical Project Manager Intern

March 2023 - June 2023

- Worked closely with the technical lead at a fast-paced investment trading platform startup, directly influencing key data infrastructure decisions, by considering price, implementation and integration, and performance
- Implemented a relational schema and wrote **SQL** scripts to **extract, transform, and load user analytics**
- **Designed and implemented pipeline from MongoDB into BigQuery** to be displayed in Looker Studio

Projects

MyDian Dashboard

2025-Current

- Used **GenAI tools, Supabase, and React** to efficiently build login, onboarding, and **dashboard** for connecting US and Chinese manufacturers.

Fine Tuning LLaMA 3.1 for Financial Sentiment Analysis

Fall 2024

- Increased sentiment analysis accuracy on financial news by 9% by fine-tuning LLaMA 3.1 with qLoRA, improving accuracy from 0.75 to 0.84 to provide more accurate insights in market trend prediction

Pet Tinder Web Application

Spring 2024

- Social Media posts, Tinder matching algorithm, instant messaging, and user authentication developed using **Agile methodology and MERN** stack

Personal Portfolio Website

Winter 2024

- Continuous deployment of client and server MERN stack application to my custom domain henryszhang.com.

Skills, Extracurriculars

Programing Languages: Python, SQL, Java, C/C++, C#, HTML, Javascript, Typescript, HTML/CSS

Libraries and tools: LLMs, Git, Docker, Azure, Bigquery, pandas/numpy, Langchain, Flask, Django, React.js MERN, spaCy, Postgres, Redis, AI tools, BI tools, Agile methodology

Languages: English (Native), Chinese (Fluent)
